Mobile Developer with 2+ years of experience in Android and cross-platform development (Kotlin, React Native, Flutter). Experienced in building scalable fintech applications, implementing clean architecture, and delivering production-ready apps with end-to-end deployment.

WORK EXPERIENCE

Mobile Development (Freelance)

Feb 2026 - Present

PUAS Hub

Remote

- Built and maintained a Flutter mobile app for PPOB and digital payment services.
- Implemented Clean Architecture and BLoC, improving code maintainability and development consistency across features.
- Integrated backend APIs using Dio, enabling reliable real-time transaction processing.
- Improved user experience by standardizing state handling (loading, error, retry), reducing UI inconsistency across screens.
- Delivered stable production features supporting daily transaction workflows.

Full-stack Developer (Freelance)

May 2025 - Present

Diprojectin

Remote

- Developed backend services using Laravel and built web applications based on client requirements.
- Delivered end-to-end features from API development to frontend integration.
- Reduced development time by reusing modular components and standardized API structures.
- Improved system maintainability by implementing structured backend architecture and clean code practices.
- Delivered multiple production-ready solutions within agreed timelines for client projects.

Mobile Developer (Full Time)

Jan 2025 - Present

PT Teknologi Kartu Indonesia

Salatiga

- Developed and maintained mobile applications within a multi-tenant fintech ecosystem, contributing to 15+ production apps.
- Led migration and redevelopment of merchant applications, improving system stability across releases.
- Implemented QRIS, NFC, Bluetooth, and POS features used in daily transactions.
- Built offline-first systems with background sync, reducing dependency on real-time connectivity.
- Managed end-to-end deployment to Play Store and App Store for multiple applications.

Android Developer (Freelance)

Nov 2024 - Jan 2025

PT. Mahawangsa

Remote

- Developed a mobile attendance application with GPS and selfie verification.
- Implemented attendance tracking features (check-in/out, history, notifications) for daily use.
- Improved accuracy of attendance data through location and image-based validation.
- Delivered a production-ready system used for employee attendance management.

EDUCATION

Bachelor of Information Systems

Aug 2018 - Nov 2024

Universitas Trunojoyo Madura

GPA: 3.48

- Studied core concepts in software engineering, database systems, and information systems.
- Developed academic projects related to mobile and web application development.
- Gained understanding of system design, data management, and application development lifecycle.

SKILLS

Mobile Development: Kotlin, Android, React Native, Expo, Flutter, MVVM, Clean Architecture, BLoC, Zustand, REST API, Firebase, Git

Backend & Integration: Laravel, MySQL, REST API, JSON, Swagger

Tools & Workflow: Git, GitLab, CI/CD, Postman, Jira

PROJECTS

Member App Ecosystem (MyBrawijaya, Sangu Lirboyo, etc.) [↗](#)

Aug 2025 - Nov 2026

- Developed and maintained multiple mobile apps in a multi-tenant system.
- Built features such as QRIS, PPOB, marketplace, and virtual card.
- Integrated APIs and managed state using React Native.
- Deployed apps to Play Store and App Store.

Puas HUB (PPOB & Digital Payment) [↗](#)

Feb 2026 - May 2026

- Built and maintained a Flutter mobile app for PPOB services (pulsa, data, listrik, e-wallet, games).
- Implemented Clean Architecture and BLoC for scalable and maintainable code.
- Integrated APIs using Dio for real-time transaction processing.
- Developed responsive UI and handled production issues for stable performance.

DIGILUH [↗](#)

May 2025 - Aug 2025

- Developed a Flutter-based attendance application for government use.
- Implemented offline-first architecture with background synchronization.
- Applied BLoC and Repository Pattern for scalable state management.

Merchant SolusiNegeri [↗](#)**Jan 2025 - May 2025**

- Developed a merchant application for financial transactions with NFC and EDC integration.
- Implemented QRIS payments, E-Wallet, and transaction features.
- Applied MVVM and Clean Architecture for maintainability.
- Implemented security features such as root and emulator detection.

eMahaWangsa [↗](#)**Nov 2024 - Jan 2025**

- Developed an attendance app with GPS and selfie verification.
- Built features such as check-in/out, history, and notifications.
- Improved attendance accuracy with location and image validation.
